

The Cielo Dorado Association Board of Directors has evaluated the needs of the Association and whether an in-person meeting is required at this time given the Coronavirus (COVID-19). The Board has determined that the matters on the March 18, 2020 Agenda are not pressing and, therefore the meeting has been cancelled.

This decision has been made in an effort to keep each other healthy and safe. The board will take action on any emergency items via e-mail and otherwise will postpone the meeting business until further notice. We will continue to monitor the changing recommendations and timelines given by the CDC and WHO and will keep residents informed of activities via the website [www.cielodoradoestates.com](http://www.cielodoradoestates.com) and e-mail notices such as this.

Cushman & Wakefield | PIREs, your management team, is closely monitoring the Coronavirus (COVID-19) outbreak. According to the Centers for Disease Control and Prevention (CDC), there currently is no vaccine to prevent Coronavirus. The best way to respond to this public health threat is to avoid exposure and take everyday preventive actions to stop the spread of the virus.

The CDC issued the following guidelines to help minimize any potential health risk:

- Avoid close contact with people who are sick.
  - Avoid touching your eyes, nose and mouth.
  - Stay home when you are sick.
  - Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
  - Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.
  - Follow CDC's recommendations for using a face mask.
    - o CDC does not recommend that people who are well wear a face mask to protect themselves from respiratory diseases, including COVID-19.
    - o Face masks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of face masks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
  - Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating and after blowing your nose, coughing or sneezing.
    - o If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- For the most up-to-date information on the COVID-19 outbreak and advice for your specific location, please refer to the CDC, World Health Organization (WHO) and local county public health agencies.
